

Feature Story

Ian Kimber, AltTox Editorial Board Member, Named NC3Rs Board Chair

The National Centre for the Replacement, Refinement and Reduction of Animals in Research (NC3Rs), a British alternatives center, recently appointed Dr. Ian Kimber as its new Board Chair. Dr. Kimber is Professor and Chair of Toxicology at the University of Manchester, as well as a member of the AltTox editorial board and moderator for its Skin Sensitization forum. He replaces Lord Turnberg of Cheadle and the NC3Rs Acting Chair, Paul Flecknell of Newcastle University.

Dr. Kimber's appointment comes after the December, 2007 announcement that the NC3Rs will receive increased funding over the course of several years, reaching just over £5 million by 2010/11.

"Since its launch, the NC3Rs has been successful far beyond initial expectations," said Professor Kimber. "I'm immensely proud to be able to play a part in building on that success. The Centre is also uniquely placed to ensure that advances in science and technology are exploited fully for the delivery of replacements, reductions and refinements."
